代码说明

void setup()

videoExport = new VideoExport(this, "treasure.mp4");
videoExport.startMovie();
将代码运行过程输出为视频
grp = RG.getText("you are like the treasure i found on earth", "FreeSans.ttf", 40,
RG.CENTER);
读取ttf，生成文字所 对应的RShape

void paintStroke(float strokeLength, color strokeColor, int strokeThickness)

绘制不同颜色粗细的线条，使用内置的stroke();strokeWeight();curve() 等函数。

void draw()

float t = map(mouseX, 0, width, 0.01, 0.99);
RShape circleSeg = RG.split(circle, t)[0];
RG.setAdaptor(RG.BYELEMENTPOSITION);
RShape adaptedGrp = RG.adapt(grp, circleSeg);
通过获得的字符串坐标来绘制圆

void mousePressed()

鼠标移动来控制字的展开
